2.3.2 - Teachers use ICT-enabled tools including online resources for effective teaching and learning

Our state-of-the-art, fully networked classrooms are equipped with dedicated LCD projectors, Smart Board, integrated audio-visual systems, and software tailored to manage and integrate all these IT components with students' laptops. Moreover, every classroom is outfitted with internet connectivity and a three-tier wireless network, supported by a central server housing archives of files and databases. This infrastructure enables intra-class communication, as well as the storage and retrieval of teaching and learning materials. Such an environment promotes group learning through active interaction and participation.

In International Institute Management Studies , classrooms and labs are ICT enabled with projectors installed and the campus is enabled with high speed Wi-Fi connection. The faculty use various ICT enabled tools to enhance the quality of teaching-learning like

- 1 Through LMS used to manage and post course related information learning material, quizzes, lab submissions etc.
2. Computer labs are used to conduct learning through simulations.
3. Online drawing tools like concept maps, mind maps, are used to perform student centric activities.
4. The PPTs are enabled with animations and simulations to improve the effectiveness of the teaching- learning process.
5. The online learning environments are designed to train students in open problem-solving activity.
6. Media lab facility is used to create video lectures and upload in appropriate platforms for students to use as extra learning resources.
