NAAC Accredited

2.6.1 - Programme Outcomes and Course Outcomes for all Programmes offered by the institution are stated and displayed on the website and communicated to teachers and students

At the International Institute of Management Studies (IIMS), Program Outcomes (POs) and Program Specific Outcomes (PSOs) are prominently displayed at strategic locations within the campus and are also available on the institute's website. This ensures that both faculty and students are well-informed about the desired learning goals and expectations. To further enhance awareness, each classroom is equipped with a dedicated board displaying Course Outcomes (COs), providing students with ready reference material to guide their academic and professional journey.

The integration of POs, PSOs, and COs serves as a critical foundation for structuring the teaching-learning framework. Program Outcomes and Program Specific Outcomes help outline the broader objectives and specific competencies that students are expected to acquire through their academic program. Course Outcomes, on the other hand, focus on providing students with a clear understanding of course expectations, facilitating effective learning, and presenting a clear roadmap for employability, skill development, and entrepreneurial opportunities. Additionally, COs address essential cross-cutting issues such as gender, environmental sustainability, human values, and professional ethics, fostering holistic development.

The Academic Council is responsible for framing a curriculum that integrates POs, PSOs, and COs for all programs. During syllabus development, factors such as scope, methodology, and measurable outcomes are considered. The curriculum is further enriched with innovative teaching methods, carefully curated materials, and experiential learning activities like live projects and industrial visits. This approach ensures that the educational experience is comprehensive and aligned with industry needs.
